Thank You.

WESLEY DRIVE STREET **REPLACEMENT**

STREET AND ROADWORK

Street repairs, lane marking and other road related work is common this time of year. Caution should always be used when driving in areas marked for construction, wet paint etc. The safety of our workers and the traveling public is our main concern while completing the job in a timely fashion.

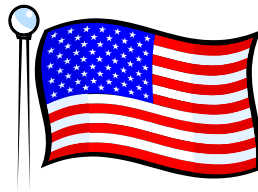

Whenever streets are worked on barricades, signs and other measures are used to alert the public. Barricades and barrels are used for specific reasons and they should remain in place until moved by the contractor or city personnel. This is done not only to protect the workers but the finished product and work being done. At no time should motorists or homeowners move or ignore traffic control devices.

No one likes sitting in traffic or being detoured from his or her normal routine. We simply ask that everyone remain patient, pay attention to traffic control devices. The city and the contractor will make every effort to minimize inconvenience to the traveling public.
